CHAIRMAN'S MESSAGE

ICT Academy has been playing an instrumental role in forging stronger relationships between the academia and the industry.

The Academy has been evolving in various aspects of the curriculum, research, and teaching methodologies, in a country that counts technology as its key differentiator.

The efforts of ICT Academy are primarily focused on talent creation, research, entrepreneurship, and innovation.

The meticulous exercises of the Academy in skilling the talent band in the nation, particularly in tier II and tier III belts, has fetched it an edge for national expansion.

On behalf of ICT Academy, I humbly request your greater interest in participating in the initiatives of the Academy.

- **Lakshmi Narayanan**, Chairman, ICT Academy and Emeritus Vice-Chairman, Cognizant

CEO'S MESSAGE

ICT Academy is soon entering into a decade of serving the cause of bridging the industry-academia gap and the skill gap. About nine years back, the intention of ICT Academy was to facilitate teachers with the technology and exposure that was useful for them to train the students in making them employable. Further, education institutions faced many hurdles like employability, industry interaction opportunity, less publication of research papers etc. In such a situation, ICT Academy plunged into breaking all those barriers primarily and emerged to empower students with entrepreneurship abilities.

The Academy has clear set goals and defined services delivered with utmost transparency, quality, standardized processes and operations, promptness in servicing, and sincerity.

All these 9 years ICT Academy has been introspective in grooming itself and has matured with time in terms of shaping its services with such standards of huge players in other domains that hold a CMMI level certification.

ICT Academy is building by the day, a strong team of highly motivated individuals who are conscientiously aware of the cause they are working for. It is a team of hardcore professionals that is enthusiastically aligned towards serving the nation, which is the goal and vision of ICT Academy.

Being in the training industry, the band of trainers at the Academy is dedicated to serve the society rather than just deliver training programs. They endure the topographical odds in the tier II & III belts and render the service unmindful of personal comforts, which is a reflection of their devout professionalism. ICT Academy is keeping pace with the Industry Revolution 4.0 and has been evolving futuristic courses on concepts like AI, Machine Learning, and Deep Learning to prepare the current day talents fit for future of work.

As a result of such devout delivery of service, NITI Aayog the Planning Commission body of India (The National Institution for Transforming India), studied the Academy and endorsed it to be replicated in all the states across India. This is a crowning glory to ICT Academy's selfless services rendered to the nation.

Following the endorsement of NITI Aayog, ICT Academy has expanded its operations to 14 states of India in Andhra Pradesh, Assam, Chhattisgarh, Goa, Jharkhand, Karnataka, Kerala, Maharashtra, Odisha, Puducherry, Punjab, Rajasthan, Tamil Nadu, and Telangana.

ICT Academy has arrived at a juncture where the industry is approaching the Academy for collaboration to deliver its certifications and trainings. This is an evidential repercussion of the Academy's diligence in delivery.

As a shift ahead, AICTE approached ICT Academy to train students in the Northeast part of India, following which ample number of trainers are recruited, and established the office. Not limiting to these efforts, ICT Academy will go all-out to ensure that Northeast of India produces employable talents.

ICT Academy's service in Puducherry is consistent in skilling the graduating students through ITFS (IT Finishing School) program. Moreover, ICT Academy is also providing Digital Literacy training to newly recruited police personnel in the State.

ICT Academy has ventured into various states to conduct Bridge™ conferences this year, with a vivacious reception from each of them. The recent series of Bridge™ conferences held in Delhi, Bengaluru, Hyderabad, Vijayawada, Pune and Tamil Nadu received an overwhelming response with the audience. This reflects the strategic progression of ICT Academy in identifying the vacuum in industry-institute connect and efficiently addressing it throughout the nation.

In order to develop the self-learning habit midst the students, ICT Academy collaborated with Salesforce and conducted a 24 Hour learnathon, during which the students engaged in self-learning activities, participated in online assessments and earned badges. 11,800 students from 118 colleges participated in the learnathon and earned more than 5 lakh badges.

ICT Academy has forged a strong relationship with Autodesk and has been conducting India Design Week, a unique initiative for budding designers to learn, explore, innovate and design eco-friendly products in built environment, disaster relief, energy, food, health & well-being, mobility, waste, water, clean industry and resource & materials. Fulltime students enrolled under Mechanical, Aeronautical, Automobile, Mechatronics, and Robotics and Production Engineering courses 'were part of this initiative'. Through this initiative, ICT Academy and Autodesk have jointly enabled students to not only work on live product designs but also get an opportunity to attend a series of workshops, mocks, and product showcase. So far, ICT Academy has organized India Design Week at Chennai, Coimbatore and Madurai with 1600+ participants from 150 colleges who presented 750 innovative projects.

ICT Academy has expanded its publication wing, with the launch of its periodical insights. The insights envision niche publications that provide appropriate inputs to help academia overcome contemporary challenges. As part of its endeavor to help the teachers of the country grow and develop, ICT Academy also envisions conducting workshops that illuminates teachers on ten traits that they must develop to leapfrog from being good to great. Through simulation, role-play and other absorbing activities, the workshop crafted to help teachers effectively inculcate the distinct traits. Today, ICT Academy is revered by industry and academia as an element that balances the demand supply chain by augmenting the talent creation through minimizing the industry-academia gap.

ABOUT ICT ACADEMY

1.1 ABOUT ICT ACADEMY

ICT Academy is an initiative of the Government of India in collaboration with the State Governments and Industry. ICT Academy is a not-for-profit organization, the first of its kind venture under the Public-Private-Partnership model that endeavors to train the higher education teachers and students thereby exercises developing the next generation teachers and industry ready students.

ICT Academy was started to meet the skill requirements of the industry and generate more employment especially in tier II and III parts of the country. The organization was formed with representations from Government and Industry.

With training of teachers and students as the primary objective, ICT Academy has been working through a seven pillar program in the areas of Faculty Development, Skill Development, Entrepreneurship Development, Youth Empowerment, Industry-Institute Interaction, Digital Empowerment and Research & Publications.

ICT Academy is continuously striving on every aspect to provide a holistic service to every stakeholder of the education ecosystem in developing the next generation of talent pool in India to make them industr-ready employees, innovators, entrepreneurs and leaders.

ICT Academy is endorsed and recommended by NITI Aayog (National Institution for Transforming India Aayog), the National Planning body of Government of India as one of the unique organizations for dissemination and replication, which is aligned to the Skill India Vision of the Government of India.

Through its various initiatives, ICT Academy has been part of strengthening the India's four important visions namely Skill India, Digital India, Startup India and Make in India

We collaborate with public and private organizations to create, integrate and disseminate knowledge in the field of ICT to bridge the gap between academic output and industry requirements thus providing every learner an equal opportunity to become industry-ready.

1.2 VISION

To be a leading ICT knowledge centre, providing consultation and training through industry specific research thereby creating a new generation of talent pool.

1.3 MISSION

We collaborate with public and private organizations to create, integrate and disseminate knowledge in the field of ICT to bridge the gap between academic output and industry requirements thus providing every learner an equal opportunity to become industry ready.

INDUSTRY COLLABORATION

ICT Academy being an industry-led initiative has forged strategic relationship with leading corporate houses. One of the major strengths of ICT Academy is its unique blend of Corporate, Academia and Government collaboration. These leading corporate contribute not only to the technical know-how, but also the time and effort of senior members from the organization that they spend for ICT Academy in bridging the Industry-Academia skill gap. These partner companies provide inputs to ICT Academy on the current industry trends, skill requirements for the future, etc., apart from directly supporting through providing content and experts for training.

Starting with the ICT Companies, ICT Academy is also establishing partnership with Manufacturing, Retail, BFSI, Hospitality and Automobile sector companies. A group of senior executives from these large companies are a part of the ICT Academy Board of Studies who review the course, the methodology, the delivery mechanism and also provide inputs constantly for upgrading the programs. Through ICT Academy initiatives, the industry shall also benefit by the availability of improved quality talent pool which is industry-ready. This initiative will help the industry to cut down on the training cost and reduce the lead time required to deploy fresh talent to deliver productive work. The need is also felt to have industry-institute interaction to share the ever changing requirement in terms of technology and the skills required for the future talent pool.

The online channel featuring all sessions of bridge conference has been so far witnessed by around 9 Million viewers, thereby making Bridge a Global Platform.

6.1.1 BRIDGE™ 2017 - COIMBATORE EDITION

Today, we are at the beginning of the Fourth Industrial Revolution. Developments in Genetics, Artificial Intelligence, Robotics, Nano Technology, 3D Printing and Biotechnology, to name just a few, are all building on and amplifying one another. In today's scenario of this massive technological change accompanied by talent shortages, mass unemployment and growing inequality-reskilling and upskilling of today's workers will be critical. While much has been said about the need for reform in basic education, it is simply not possible to weather the current technological revolution by waiting for the next generation's workforce to become better prepared. Instead it is critical that educational institutions, corporate and Government to take a proactive approach in creating an enabling environment, rapidly and creatively, to assist these efforts.

ICT Academy held a full day conference on 13th September 2017, Hotel Le Meridien, Coimbatore with the theme "THE FUTURE OF WORK", which was the convergence of the stakeholders driving Skill India, Digital India, Start-up India and Make in India, discussing the role and importance of creating next generation talent pool for the future of work, thereby leading to the transformation of India in line with global benchmarks.

Master Class - The Rise of Artificial Intelligence and Deep Learning

AI is everywhere. Intelligence is no longer exclusively human.

Modern technologies and the dawn of machines powered by Artificial Intelligence (AI) have already strongly influenced the world of work in the 21st century. Computer systems, algorithms and software simplify everyday tasks, and it is impossible to imagine how most of our life could be managed without them.

When we transfer the past experience to the future, distressing questions arise: what will the future world of work look like? Will humans spend less time earning their livelihood in future world? Alternatively, are mass unemployment and poverty also a possible scenario for the future world, a world where robots and intelligent systems play a progressively dominant role? Economic structures, workplace relationships, job profiles, working culture and remuneration models will undergo major changes.

Industry 4.0 introduces trend of automation and data exchange in manufacturing technologies. The cyber-physical systems monitor the physical processes of the factory and make decentralized decisions. In today's business, Industry 4.0 is driven by digital transformation in vertical/horizontal value chains and product/service offerings of the companies. The required key technologies for Industry 4.0 transformation such as Artificial Intelligence, Internet of Things, Machine Learning, Cloud Systems, Cybersecurity, Adaptive Robotics cause radical changes in the business processes of organizations.

Master Class - Upskilling Workforce for the Fourth Industrial Revolution

Every Educational Institution is of the opinion that as representatives of the academia, it is the need of the hour to understand the recruiter's needs. The industry being volatile, the skill requirements keep on changing and it is essential to keep abreast of the needs. The session aided in gathering some critical industry insights towards better employability of students. This track featured HR leaders of some of the largest IT and engineering companies sharing an employer's perspective on shaping young talent to meet industry expectations.

Obviously, creating a talent pool that is fit for recruitment is essential. On the other hand, industry is in the outlook for such talents that are with entrepreneurial abilities to take the business further. This scenario makes imperative the efforts to establish High Impact Placement that work together to produce such talent that is supple to take up a career in either of the options. This transformation shall be enhanced through wider industry-institute interactions that provide the right guidance periodically.

The 32nd BRIDGE™ in Chennai had an exclusive workshop for Training and Placement officers. The Theme of the session relied on "Understanding the Industry needs on the employability of students". This session created a common platform to discuss the current issues and challenges faced by different colleges in terms of core skill development, network and job opportunity for students. Placement Heads, Placement Coordinators, Training and Placement Executives from any educational institutions attended this workshop to create more industry oriented job opportunities for students.

6.9 POWER SEMINAR

ICT Academy has been conducting expert-led seminar series for the students addressing the current and emerging topics across domains under its Power Seminar initiative. ICT Academy Power Seminar is a seminar series, conducted at member institutions, featuring noted industry experts as speakers, deliberating on niche technical topics which are attended by specific student groups. In these seminars, based on the topic, the speakers also sensitize students about research areas and latest advancements in the industry. The sessions in these seminars are followed by activities of brainstorming and debates involving the speakers and the students.

The seminar series has a sole objective of igniting the minds of the students, which leads them to develop interesting inter-disciplinary aspirations. It also enhances the essential academic skills, critical thinking skills which are considered necessary for academic success. The “Power Seminar” covers broad range of topics across different domains.

8.11 AN INITIATIVE OF ALL INDIA COUNCIL FOR TECHNICAL EDUCATION, EMPLOYABILITY ENHANCEMENT TRAINING PROGRAM – PHASE I & PHASE II

Based on the trends witnessed in productivity and the likely growth potential of the IT and ITES industry, it is expected that the industry would employ more than 15 million persons directly by 2022 in India. A large portion of this employment is expected to occur in the sectors mentioned above. With proper orientation and additional training, the skill gap can be bridged and employment promoted, for the educated. What is needed is the initial orientation, motivation and mentoring. The need of the hour is to identify the market opportunities and training for the mid-level students.

Skill building in this sector is required to ensure constant up-gradation of skills in the projected workforce of more than 15 million persons by 2022. Among this 70-80% will be in the junior and mid-level. Skills and knowledge are the motivating force of the financial growth and community development of our country. They have become even more important given the increasing pace of globalization and technological changes provide both challenges that are taking place in the society. Skill building can be viewed as a device to improve the efficacy and contribution of students to improve the quality of our nation. Skill building could also be seen as an instrument to empower the individual and improve their social acceptance.

ICT Academy joined hands with AICTE and provide Employability Enhancement Training Program training for 16,962 final year and pre-final year students on IT/ITES and Telecom sector across the Northeast region.

YOUTH INITIATIVES

With more than 10 Lakh students graduating every year, each student needs to create a unique value for him/her to be able to attract suitable employment options. In today's competitive business world and difficult economy, lucid, effective communication is more essential than ever before. It is the foundation on which careers are built, which is a crucial component of lasting success. ICT Academy team of experts has designed a premium program under ICT Academy Youth Initiatives in empowering aspiring students and training them to make the transition from the campus to their professional world successfully.

ICT Academy Youth Circle's mission is to help the students improve the skills of speaking, listening and thinking, through a relaxed, friendly and supportive environment. Every student has the opportunity to develop communication and leadership skills, which in turn foster self-confidence and personal growth. ICT Academy Youth Circle provides opportunities for youth to practice English speaking skills by sharing the experience, reflecting on the speech, connecting it to real life examples, and applying the knowledge that results to other situations.

11.2 AUTODESK

11.2.1 INDIA DESIGN WEEK 2017

Ecosystems are essential to the survival of human societies and economies. There are substantial risks that ecological degradation that would diminish the future well-being of humanity. Regime shifts in ecosystems cause rapid, substantial changes in ecosystem services and human well-being. The human population is becoming connected & crowded, consuming & polluting, and in many ways less diverse than anytime in history. The question that arises is, whether it is possible to satisfy the needs of the population that is growing exponentially while preserving the carrying capacity of our ecosystems, biological and cultural diversity. The generations of the future would never know the ecosystems we had the privilege of growing up with, unless we address these problems with positive solutions.

ICT Academy, in association with Autodesk, presented India Design Week 2017, the largest better-than-ever design event for “young creators of tomorrow” looking to unleash the Power of Design and contribute towards the furtherance of ecosystem. The inaugural edition had the theme “Design for Ecosystems” with an objective to build designs for a better ecosystem.

The event was conducted in 3 locations across Tamil Nadu & Puducherry, in a “24 Hour Design Challenge” format where budding designers learnt, explored, innovated and designed for a better living. This event provided an opportunity for budding designers to express their design views on the future of living through their innovative and visionary design thinking. The event aimed to foster budding talent in design and exposed them to all aspects of product design process.

14	KNOWLEDGE UNDERSTANDING AND ADVANCED SEARCHING	R Vidya, D Vigneshwara Raj, K Sujatha	Thiruvalluvar University, India, Vikiinformatic School of Computing and Soft Skills, India, Government College of Engineering, Tirunelveli, India"
15	FINANCIAL FORECASTING USING DECISION TREE (REPTree & C4.5) AND NEURAL NETWORKS (K*) FOR HANDLING THE MISSING VALUES	J Jayanthi, Gurpreet Kaur, K Suresh Joseph	Lovely Professional University, India, Pondicherry University, India
VOLUME: 07 ISSUE: 04 JULY 2017			
16	PRESENTING SEARCH RESULT WITH REDUCED UNWANTED WEB ADDRESSES USING FUZZY BASED APPROACH	Nancy Jasmine Goldena	Sarah Tucker College, India
17	RICH SEMANTIC SENTIMENT ANALYSIS USING LEXICON BASED APPROACH	Hedayatullah Lodin, Prem Balani	G.H. Patel College of Engineering and Technology, India
18	GENERATION OF TRANSLUCENT LANGUAGE BY SUPERIMPOSITION OPERATION	C Annal Deva Priya Darshini, V Rajkumar Dare	Madras Christian College, India
19	AN EFFICIENT PATIENT INFLOW PREDICTION MODEL FOR HOSPITAL RESOURCE MANAGEMENT	Kottalanka Srikanth, D Arivazhagan	AMET University, India
20	ASSESSMENT OF LIBRARY USERS' FEEDBACK USING MODIFIED MULTILAYER PERCEPTRON NEURAL NETWORKS	K G Nandha Kumar, T Christopher	Government Arts College, Coimbatore, India
21	SINGLE VERSUS MULTIPLE TRIAL VECTORS IN CLASSICAL DIFFERENTIAL EVOLUTION FOR OPTIMIZING THE QUANTIZATION TABLE IN JPEG BASELINE ALGORITHM	B Vinoth Kumar, G R Karpagam	PSG College of Technology, India
22	A HYBRID APPROACH FOR POLARITY SHIFT DETECTION	Michele Mistry, Prem Balani	G.H. Patel College of Engineering and Technology, India
23	HEART RATE VARIABILITY CLASSIFICATION USING SADE-ELM CLASSIFIER WITH BAT FEATURE SELECTION	R Kavitha, T Christopher	PSGR Krishnammal College for Women, India, Government Arts College, Coimbatore, India
VOLUME: 08 ISSUE: 01 OCT 2017			
24	AN APPLICATION OF PSO-BASED INTUITIONISTIC FUZZY CLUSTERING TO MEDICAL DATASETS	S Parvathavarthini, N Karthikeyani Visalakshi, S Shanthi, K Lakshmi	Kongu Engineering College, India, NKR Government Arts College for Women, India,
25	DETERMINATION OF QUICK SWITCHING DOUBLE SAMPLING SYSTEM BY ATTRIBUTES UNDER FUZZY BINOMIAL DISTRIBUTION – SAMPLE SIZE TIGHTENING	K Ramya, G Uma	PSG College of Arts and Science, India
26	PREDICTION OF TRANSMITTED WAVE HEIGHT OF TANDEM BREAKWATER USING PSO-SVM	S Karthik, Subba Rao	National Institute of Technology, Karnataka, India
27	CONSTRUCTION COST PREDICTION USING NEURAL NETWORKS	Smita K Magdum, Amol C Adamuthe	Rajarambapu Institute of Technology, India
28	ENRICHMENT OF ENSEMBLE LEARNING USING K-MODES RANDOM SAMPLING	Balamurugan Mahalingam, S Kannan, Vairaprakash Gurusamy	Madurai Kamaraj University, India

S.No	Paper Title	Author Name	Institution Name
29	CLUSTERING CATEGORICAL DATA USING k-MODES BASED ON CUCKOO SEARCH OPTIMIZATION ALGORITHM	K Lakshmi, N Karthikeyani Visalakshi, S Shanthi, S Parvathavarthini	Kongu Engineering College, India
30	AN ELM FOR BI-CLASSIFICATION OF VERTICALLY BUNDLED ELECTRICITY MARKET PRICES	S Anbazhagan, V Sivakumar	Annamalai University, India, Anubavam Technologies Private Limited, USA
31	A NOVEL APPROACH FOR LONG TERM SOLAR RADIATION PREDICTION	Manju Khanna, N K Srinath, J K Mendiratta	R V College of Engineering, New Delhi, India
VOLUME: 08 ISSUE: 02 JAN 2018			
32	ENHANCED ALGORITHMS FOR MINING OPTIMIZED POSITIVE AND NEGATIVE ASSOCIATION RULE FROM CANCER DATASET	I Berin Jeba Jingle, J Jeya Acelin	Noorul Islam University, India, Hindustan College of Arts and Science, India
33	TEACHER RANKING SYSTEM TO RANK OF TEACHER AS PER SPECIFIC DOMAIN	Anjali A Dudhe, Sachin R Sakhare	Vishwakarma Institute of Information Technology, IndiaVishwakarma Institute of Information Technology, India
